Holafly

Our history

Holafly's mission is to ensure seamless Internet connectivity for all travelers. Co-founders Pedro and Lidia, inspired by their frustration during a trip to Thailand without internet, conceived the brilliant ideas of enabling travelers to purchase data plans for any destination from their home country.

2017: Where it all started: Born in 2017 from personal travel experiences, realizing the crucial need for connectivity while on the move.

2018: Connectivity revolution: Joined the Lanzadera Acceleration Programme in 2018, leading to the successful launch of eSIM technology, transforming the way people stay connected during their travels.

2019 - 2021: Global expansion: Expanded into France and Germany, establishing offices in Valencia and Medellín, strengthening international presence, and enhancing customer service worldwide.

2022: Sustainability focus: Committed to carbon neutrality by 2022, emphasizing eSIM technology to reduce environmental impact by eliminating physical SIM cards.

2022 - Current: Global reach and innovation: Expanded operations to Lima and Bangkok, launched iOS and Android apps, providing travelers with easier eSIM management. Excited about the endless possibilities that lie ahead!

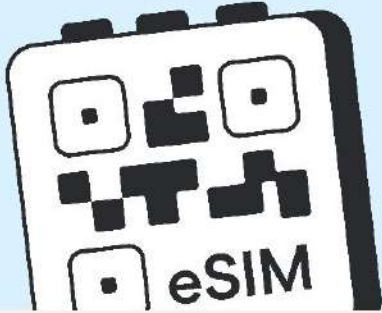

Holafly

Tired of running out of data during crucial moments or facing unexpected charges after a business trip?

Our international eSIMs offer a hassle-free solution. Simply scan a QR code to set up and enjoy 4G or 5G connectivity, depending on your location and device compatibility. Say goodbye to expensive international roaming bills and hello to uninterrupted internet access worldwide.

What is an eSIM and how does it work?

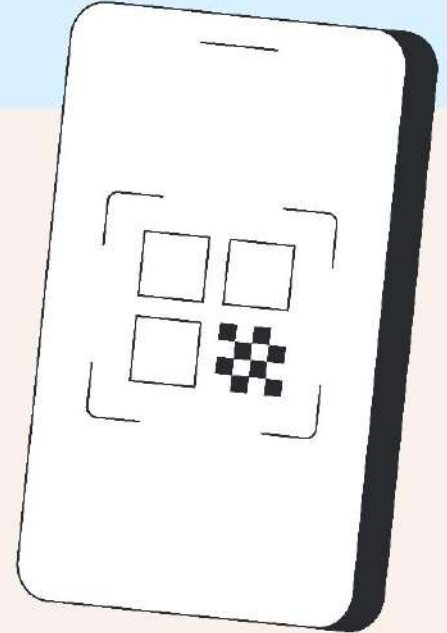

Unlock instant connectivity with eSIM, the digital evolution of traditional SIM cards. Installed as a microchip in your device, eSIM allows immediate activation of multiple profiles, eliminating the need for physical cards or store visits. Experience the future of SIM technology – eSIMs, embedded seamlessly in your device for hassle-free connectivity.

How to configure an eSIM?

Configure your eSIM effortlessly anywhere, whether at home, in the airport, or on the go – all you need is internet access. Simply follow a user-friendly process, akin to taking a selfie. Use your camera to scan the QR code we provide at purchase, and your phone instantly captures and transfers the embedded information.

It's as easy as point, scan, and connect!

Which mobiles are compatible with eSIM?

Please note that in order to have an eSIM, you must meet certain requirements:

-  Have an eSIM compatible device.
-  Have an unlocked cell phone, which means that you must be able to use any operator.
-  Have internet access to scan the QR.
