

# YOU ARE WELCOME AT THE CITADEL OF DINANT

## for individual visitors

### Discover the Citadel of Dinant

Perched on a rocky spur high above the city, the Citadel of Dinant majestically overlooks the town and offers a breathtaking view of the Meuse River.

The first fortification was built here in the 10th century to protect Dinant and the Meuse Valley. The current Citadel, built in 1818 by the Dutch, still stands on the foundations of those medieval walls.

Those up for a challenge can climb the 408 steps leading up to the Citadel, or simply take the cable car for an easier ride to the top.

Once there, take a well-deserved break on the Les Canons terrace and enjoy a drink with the best view of the region. You can also grab a tasty bite — burgers, fries and more. Families will love the children's play area too.

For a taste of local cuisine, the Restaurant La Citadelle awaits you at the foot of the cable car.

## The HistoPad: Your New Visiting Companion

The Citadel now offers an all-new augmented reality experience that's interactive, educational and fun!

With the HistoPad tablet, you can dive into an immersive journey through time, exploring the Citadel across the centuries and reliving key moments in the history of the fortress and the city.

Thirteen “time portals” scattered along the visitor route let you discover the Citadel during its Dutch period, its days as a military prison, and the tragic events of the fierce battles of 1914. Younger visitors can hunt for hidden objects in an interactive treasure quest, while adults dive deeper into the military, political and architectural stories of each era. And for a unique keepsake, you can even take a photo dressed in a period costume.

Included in the ticket price, this tool lets everyone explore at their own pace and according to their interests.

The experience is available in eight languages, including Japanese.
